WORD FROM THE CHAIRPERSON OF THE BOARD

This year has been a milestone for ACMS, marked by the organization's empowerment on January 1st, 2024. A major achievement that testifies to the reliability and viability of our structure, and our commitment to our communities.

I'd like to greet the exceptional work carried out by our team, as well as the constant support of our partners and backers. Thanks to this collaboration, ACMS has been able to pursue its mission of responding to the needs of the population, by providing innovative and adapted solutions to improve the well-being of everyone.

We remain committed to our mission, determined to build a healthier, more self-sufficient future for all.

Dr Marie Madeleine LOUKA
Chairperson of the Board

WORD FROM THE EXECUTIVE DIRECTOR

2024 was particularly significant for the concrete achievements in our areas of intervention. ACMS' mission has always been to act immediately wherever the need arises, offering innovative solutions to help communities build their well-being.

Thanks to your ongoing support, we have been able to strengthen this mission and extend our impact among the most vulnerable populations.

Our partnerships, the commitments of our backers, and the tireless work of our employees have been essential levers in achieving our objectives. This report reflects not only the results achieved, but also the many synergies that have enabled us to meet the challenges of public health.

I would like to extend my warmest thanks to our partners for their unfailing cooperation and support, to our funders for their confidence, and to our employees for their commitment at every stage of our work. Together, we have made a significant difference, and together we will continue to build a healthier, fairer future for all.

Annie Michele Mabally
Executive Director

KEY FIGURES AND IMPACT

Our human resources

Our field teams are made up of locally-recruited staff, to ensure that we are as close as possible to the needs of local populations. We employ **122** staff and **36** consultants.

Our financial resources

6 donors have placed their trust in us and we have implemented **10** projects with a budget of **7 970 579 778 FCFA**.

Our institutional partners

We have contracted **582** partners (**09** Community-Based Organizations, **421** Health Units and **66** health districts, **17** Civil Society and Development Organizations and **69** pharmacy clerks trained in stock management) to implement our activities.

Strengthening the health system

443 providers trained in comprehensive family planning

24 quality assurance officers trained in recognition of complications and pharmacovigilance

69 pharmacy clerks trained in stock management

30 peer educators and **50** community health agents trained in reproductive health, nutrition and communication.

KEY FIGURES AND IMPACT

37 122 young people and teenagers were taught about family planning methods in schools and universities

779 multi-purpose Community Health Workers (ASCp) trained in **10** districts for Interventions under Community Directive (ISDC)

7 310 suspected malaria cases were received by ASCP in the community

39 907 suspected malaria cases benefited from a rapid screening test in the community

66 921 home visits were carried out, reaching **191 148** people

13 977 educational talks were given, reaching **134 974** people.

Support for the seasonal malaria prevention campaign (CPS)

6 011 community mobilizer-distributors trained
981 143 children received treatment, including **828 639** in rural areas

Coverage rate for SPC cycles :

Cycle 1: 101.8% (981 143 children treated / 970 660 expected)
Cycle 2: 101.2% (1 327 290 children treated / 1 311 811 expected)
Cycle 3: 99.6% (1 265 780 children treated)
Cycle 4: 98.8% (1 309 949 children treated)
Cycle 5: 100.5% (909 694 children treated / 907 163 expected)

AIDS PREVENTION

In 2024, ACMS implemented the following projects:

- **The AIDS Prevention Project in Central Africa (PPSAC), financed by KFW** through OCEAC, and implemented nationwide, has the overall aim of ensuring greater availability of condoms and positive behavioral change among the target groups concerned, with a view to contributing to the reduction of HIV and the harm caused by stigmatization and discrimination towards PVIH.

- **The HIVST-Global Fund M&E Strengthening Project funded by the Children's Investment Fund Foundation (CIFF)** aims to support the strengthening of the Monitoring and Evaluation System of the National AIDS Control Committee, particularly with regard to HIV Self-Testing, with the overall objective of reinforcing evidence-based decision-making.

- **The HIV-CHASAC project is an HIV/AIDS project funded by PEPFAR** (the U.S. President's Emergency Plan for AIDS Relief) and implemented by ACMS. The overall objective of this project is to implement HIV prevention, care and treatment services and reduce health disparities in clinical cascades for all target populations and vulnerable groups in the Adamaoua and Northern regions of Cameroon.

SEXUAL AND REPRODUCTIVE HEALTH

- **The Support Project for Refugee Women and Malnourished Children in RCA, Nigeria and Cameroon (UNICEF - Bridge)** is a KFW initiative whose main aim is to improve the health and nutritional status of refugees, displaced persons and the local population, particularly young women, pregnant women and malnourished children under five, in the four most vulnerable regions of Cameroon (Far North, North, East and Adamawa).
- **The Access to Reproductive Health Services Program (PASSR), funded by KFW**, in its phase 2, is being implemented in four regions: North, Far North, Adamaoua and East. Its aim is to increase the use of better quality reproductive health services

MALARIA PREVENTION AND TREATMENT

- **The overall aim of the SEMBE I project, funded by USAID** and implemented in the Far North region, is to build the capacity of the Cameroon government and local partners to lead and promote local solutions in the fight against malaria.

As part of this project, several strategic actions in the fight against malaria and capacity-building for health actors have been carried out, notably through the Seasonal Malaria Prevention Chemotherapy (SPC) campaign and various training courses. The project is being implemented in 32 health districts in the Far North Region.

HEPATITIS C PREVENTION

- **The Hepatitis Self Testing Initiative in Africa (STAR HepC), funded by Unitaid** and implemented in the Central region, which facilitates the rapid scale-up of hepatitis C Self Testing, with the overall aim of reducing hepatitis C-related mortality and morbidity.

COVID 19 PREVENTION

- **The Meeting Target and Maintaining Epidemic Control (EPIC) project, funded by the U.S. Agency for International Development (USAID)** and implemented in the Far North, North, Adamaoua and East regions, in collaboration with MINSANTE technical services (CCOUP and EPI), aims to prevent, prepare for response and strengthen health systems to combat COVID-19 in order to reduce re-emergence cases.
